

Deciphering an Event

Directions: You will be given a packet with 7 documents in it. Read each document carefully. Using this sheet, you must decide which documents are most important and which are not in reconstructing the event that is being described in the documents. Choose wisely because you will be asked to explain why you chose certain documents and left others out. To conclude this lesson, you will write a debriefing of the events that occurred in the documents you chose.
